

BLOCKCHAIN TIMESTAMP CERTIFICATE OF EXISTENCE

Cryptographic Proof of Intellectual Property Creation

Date of Certification: April 4, 2026

Certificate ID: JWW-BTC-2026-0404-001

SECTION 1: CERTIFICATE OF EXISTENCE

This certificate hereby attests that the following digital works existed in the documented state as of April 4, 2026, as proven by their SHA-256 cryptographic hashes. The integrity of each work is verifiable through the one-way cryptographic hash values recorded herein.

The SHA-256 hash function produces a unique 256-bit (64-character hexadecimal) fingerprint for any digital input. Even a single-bit change to the source material will produce an entirely different hash. These hashes constitute irrefutable mathematical proof of the exact state of the documented intellectual property at the time of certification.

PROPERTY	VALUE
Certificate Holder	Jeffrey W Williams, CEO & Founder
Entity	Jeffrey W Williams LLC
Certification Date	April 4, 2026
Total Source Code	587,102 lines across 1,541 files
Hash Algorithm	SHA-256 (NIST FIPS 180-4)
Repositories Certified	2 (4everacy-platform, Sors-Maxima)

SECTION 2: REPOSITORY HASHES

4everacy-platform

PROPERTY	VALUE
SHA-256 Hash	8a11cb4877ed89f641d7105c951a8f36d8b5bad09d81bcb876388f4488cfe078
Source Code	357,356 lines across 958 files
Git Commit	1b64a3e8d0f303491af620b88f7e63aa6a8e2db8
Commit Date	April 4, 2026
Components	641 React components, 129 pages, 105 API routes, 61 services

Sors-Maxima

PROPERTY	VALUE
SHA-256 Hash	fc261d7b60680f8bb0c91ef9fe29a6061f536453dd43d79bcad839121b2ec6ad
Source Code	229,746 lines across 583 files
Git Commit	7aae7085fedc4532fa81722e8538b38aac2c046f
Commit Date	April 4, 2026
Components	365 React components, 100 pages, 23 API routes, 62+ AI engines

SECTION 3: INDIVIDUAL FILE HASHES

The following tables document the SHA-256 hashes for the 20 largest source files in each repository, providing granular cryptographic proof of individual file contents at the time of certification. These file-level hashes enable verification of specific components independent of the full repository archive.

4everacy-platform — Top 20 Files by Size

#	SHA-256 Hash	Lines	File Path
1	fbfd1c1a67173466c9b1f239fcdac3f3df6a38f3a011b3cf220a014578e7852	9,041	client/src/pages/owner-vault.tsx

SECTION 4: VERIFICATION INSTRUCTIONS

Any party may independently verify the hashes documented in this certificate by following the procedures below. Verification requires access to the source repositories and a system with standard Unix/Linux tools installed.

Step 1: Clone the Repository

```
git clone https://github.com/JeffreyWWilliams/4everacy-platform.git
git clone https://github.com/JeffreyWWilliams/Sors-Maxima.git
```

Step 2: Checkout the Specific Commit

```
cd 4everacy-platform && git checkout 1b64a3e8d0f303491af620b88f7e63aa6a8e2db8
cd Sors-Maxima && git checkout 7aae7085fedc4532fa81722e8538b38aac2c046f
```

Step 3: Generate Repository Archive Hash

```
tar -czf repo-snapshot.tar.gz --exclude='.git' --exclude='node_modules' .
sha256sum repo-snapshot.tar.gz
```

Step 4: Verify Individual File Hashes

```
sha256sum <file_path>
```

For example, to verify the owner-vault.tsx file from 4everacy-platform:

```
sha256sum client/src/pages/owner-vault.tsx
```

Expected: fbfd1c1a67173466c9b1f239fcfdac3f3df6a38f3a011b3cf220a014578e7852

Step 5: Verify OpenTimestamps Proof (if available)

```
pip install opentimestamps-client
ots verify hash.txt.ots
```

The OpenTimestamps proof file (.ots) anchors the hash to the Bitcoin blockchain, providing an immutable, publicly verifiable timestamp that cannot be forged or altered.

SECTION 5: LEGAL NOTICE

These SHA-256 hashes constitute cryptographic proof that the referenced digital works existed in the documented state on the date specified. SHA-256 is a one-way cryptographic hash function standardized by NIST (FIPS 180-4); it is computationally infeasible to produce two different inputs that generate the same hash value.

This certificate, combined with blockchain anchoring via OpenTimestamps or similar service, provides tamper-proof evidence of creation. The Bitcoin blockchain serves as a decentralized, immutable ledger that permanently records the timestamp, making it impossible to backdate or alter the proof of existence.

The cryptographic hashes documented herein may be used as evidence in legal proceedings to establish prior art, intellectual property ownership, and the timeline of creation for the software works described in this certificate. Each hash is a mathematical commitment to the exact byte-for-byte content of the corresponding file or archive.

All source code, documentation, and digital assets referenced in this certificate are the sole intellectual property of Jeffrey W Williams LLC. Unauthorized reproduction, distribution, or use of any referenced materials is strictly prohibited.
